

PRE-WORKOUT FUELING

EAT BEFORE YOU TRAIN

When possible, have a balanced meal with **lean protein + a quality complex carbohydrate**.

NO TIME? GO LIGHT

If a full meal isn't practical, choose a mini meal with **protein + fruit + a healthy fat, such as ¼ cup of nuts**.

DON'T TRAIN EMPTY

Fueling helps maintain energy and reduces the risk of feeling lightheaded during your workout.

PROPER FUELING SUPPORTS A STRONGER WORKOUT

- Choose **ONE** of the protein choices (1, 2, or 3 for example) with **ONE** of the favorable complex carb choices (1, 2, or 3) for specific meals.
- Your protein amount is based on your **LEAN BODY MASS (LBM)** as shown in your **INBODY RESULTS SHEET**. Protein intake is foundational for every meal.

- Choose **ONE** of your favorable complex/ favorable carbs at 2 meals for the day. Your complex carb intake will average 30/40 grams x 2 meals in a day. Ideally first meal of the day and after the workout or after the workout and at another meal.
- Remember to review **THE GUIDEBOOK** for most of your questions and to see more variety in food options.
